Subject: Re: Questions regarding America Nepal Medical Foundation Review

Dear Julia,

Greetings

This project is based on peer to peer learning approach. Beside this, it aims to engage those trained messengers not only in the school but also in their respective locality. In Nepal, Female Community Health Volunteers (FCHVs) organize health mother group (HMG) meetings and our trained messengers will assist FCHVs' to facilitate the health awareness session. Likewise, they work closely with FCHVs' on health related activities conducted by the local level.

IRHDTC has prepared a tool (to be revised) to monitor their work. similarly, child club will keep monthly record of the activities carried out. Not only this, the program officer will support and guide them to organize health awareness activities as well.

If you have any further questions, feel free to get back to me. Thank you.

Regards,

Ram Bhandari

Executive Director

IRHDTC Nepal
