Social Welfare Council (SWC) Approval Received for Project Proposal Summary

No

The total project budget is 90 thousands USD. Out of total budget 23,000.00 USD ( Twenty three thousand US dollar) is requested to ANMF. Oxygen plant in hospital premises will be made of with that funds. No salary to any staff, travel cost or any other expenses will be made out of donated money.. All the money will be used for plant construction and its technical purpose only.

Statement of Need and Background

These are main reasons why we need oxygen plant a. Ampipal hospital is situated in quite remote area of Gorkha district of Gandaki province, mostly poor and marginalized people living who need better health care with full range of facilities in their nearest. b. Mostly old people are suffering with COPD and phenomena. Children are suffering with phenomena. They need oxygen. c. No compressed oxygen are using in hospital yet because of various difficulties. ( No medical oxygen is producing even in Gandaki province, difficulties to transport from Kathmandu, refilling problems). d. Many other districts/ government and private hospitals are needing medical oxygen gas. They can get oxygen near by at Ampipal hospital. We can provide them. e. COPD patients can buy the oxygen cylinder and use at home when it is necessary. It makes them very comfortable and no need to pay extra cost in hospital or transpoetation. f. Many Ambulance are needing refilling of oxygen in short period of time. They can get it from us. g. Ampipal Hospital can have one regular source of income by providing oxygen to other hospitals or home users. h. It will be one ambitious but very necessary element to promote health care to the community and nation.

What are the goals of the program?

•To support to Ampipal hospital by providing: a compressed Oxygen gas in Operation theatre b. regular supply of oxygen in critical care unit c. supply of oxygen to inpatients and out patients as needed. d. regular income generating source by selling medical oxygen • To support to the community by providing a. Oxygen cylinders to domiciliary treatment b. Oxygen refilling to their nearest place, that saves time and money. • To support to other hospitals/ districts by providing a. Oxygen cylinders and refilling facilities  
Main goal of this Oxygen Plant project is to support to population of Gandaki province who are in need.

How will you evaluate success or failure for each goal?

There will be clear visible out come from the targeted goals. There will be production of medical oxygen, patient will get oxygen, supply of oxygen to needy people at their home.
