Dear Drs,

Namaskar

I wish you fine all. Our oxygen plant project is in process and progress. Vendor ordered the plant and filling system. Technical team from vendor visited the location, measured the oxygen pipe line, counted the outlet and collected the necessary information. I have attached the [photo of technical team](#). According to the technical experts we have prepared the lists of necessary supplies which belongs the component of the oxygen production.

As you know that, we want to supply the oxygen bottles to the health posts, hospitals and individual as well. It is very big and important project to us. The Total budget from Rotary (about 90 lakhs) has been not enough to meet our requirements. We need much more to operate smoothly the plant.

We had almost in final stage to get 23,000 dollar two years ago from ANMF. Due to corona and some delay on Rotary process, we are late, but we are moving ahead again now.

The [presented budget outlines](#) are very necessary to produce the Oxygen and supply to the people of these area.

I am very hopeful for final decision and transferred money to Ampipal hospital from ANMF.

I have corrected the amount as twenty two lakh twenty four thousand four hundred and five only, the line below which was mistake in words.

Thanks.

With regards,

Babu Ram Giri
