**Subject:** Oxygen plant

Dear PC [Project Committee] Chair,

Can we update our PC members with some changes about the Ampipal O2 plant...

For PC members who are not aware of the project- Oxygen plant construction is underway in Gorkha in Ampipal hospital in collaboration with Nepalmed Nepal (Nepalmed contributing the bigger amount of total USD 90k, and ANMF contributing 20k). We strongly believe that it is a strongly impactful project and is good that we get to play a role of a catalyst to make this project happen from a bigger resource from other like-minded organization.

This project was approved by PC and then subsequently by the board on 2/17/20 but construction was on halt because of Covid. Now the construction has resumed and Ampipal asked for the monetary help we promised. Attached is the recent communication from the representative of Ampipal and the breakdown.

The reason it has to come back to PC again for web-ballot is looking at the breakdown, the number has slightly changed than promised (before we agreed on 23k, but the breakdown sums up to around 20k - good that it is lower than previously discussed) and for the monitoring and transparency purpose more accurate we are the better.

Thanks,

Sandesh
