Subject: Re: Project Approved

Thank you so much Julia and all friends at ANMF for this wonderful act of Love.

You may be pleased to hear that our surgeons from PHECT/Kathmandu Model Hospital are performing minimum invasive surgery in that remote hill right now!

They are proving that if we dare to get out of the box of conventional thoughts, things can and do happen.

Fortunately, we have ANMF where sanity has always prevailed. Unfortunately, however, it has been difficult to convince most of the stronger organizations that people in REMOTE and SPARSELY POPULATED regions also need Healthcare. And that Health Economics in these neglected areas means something totally different from the conventional game of numbers.

Thank you, again!
