Subject: Re: 19PNFOO1-Health Surveillance

Dear Bishnu Sir,

Namaste!

Thank you very much for your email. First of all, we would like to sincerely apologize for the delays in the implementation of the project. The preparatory phase along with the curriculum development and selection of Master Trainer was already completed and due to the COVID-19 pandemic situation earlier, we couldn't implement the program. We were more focused on the COVID-19 Emergency Responses and Training Program.

Since the situation is stable now from COVID-19, we would like to implement the project starting this month and complete it latest by next month. I hope that's ok.

I will keep you and your team updated about the progress of the project.

Thank you very much for your consideration and kind support.

Best Regards,

Swati Thapa
