3. **NCCDF training Program:** NCCDF had conducted a training program of “PPE use and Hand hygiene” and “Infection prevention and control training for doctors and Nurses of APF and Teku Hospital” which was funded by ANMF-Nepal
4. **Swab transportation Vehicle:** The swab collection vehicle has made great progress. We have completed the 30 days service of the Swab transportation vehicle. The vehicle has been coming to great use of the National Public Laboratory in Teku. It has been collecting samples, delivering RDT tests and different medical equipments. The Teku lab has really appreciated ANMF for its help in this crucial time.
5. **Tele-consultation TUTH teaching Hospital:** ANMF-Nepal also provided TUTH Teaching Hospital with a full set of computer and a mobile set to start a tele-consultation center which helps patients to connect with doctors online. Many applications like Zoom, Viber are used to connect with the patients. **Please find the attached report sent by TUTH Teaching Hospital.**
6. **National Innovation center (NIC):** ANMF-Nepal also wanted to support the innovative ideas which were preventing the spread of Corona Virus. NIC were providing sample collection booth which is a great help for sample collection and also for limited use of the PPE set in this crisis. So, ANMF-Nepal donated Rs. 10, 00,000 to NIC to support this innovative idea and also encourage them. NIC have been involved in various projects like Sample collection booth, UV radiation disinfection chamber, Intubation hoods and Robots. They have already handed over the sample booth to TUTH teaching Hospital, Bir Hospital, Teku Hospital, Army Hospital, APF Hospital and KMC. **Please kindly find the attached news clips of the sample booth in TUTH Teaching Hospital.**
