Dear Bhupesh:

As you may have figured it out, it was a couple of senior members who mentioned to me that they have not received any newsletters. They were surprised to hear how much work is being done at ground in Nepal. ANMF has become a major force in COVID-19 response in Nepal including disseminating knowledge via its regular webinars (from US), NMA-ANMF training sessions, PPE and O2 plants, etc among many other smaller projects and supports. Bhupendra has done a tremendous job as a good leader at this time of crisis.

The isolation center has become a high profile project of ANMF even more than the health posts built after the earthquake. The isolation center concept was initiated with ANMF and CCMC partnership. It was approved by the CCMC meeting under the chairmanship of Deputy-PM and endorsed by the PM and the cabinet back in December. It will be a joint program with partnership between Nepal Army, ANMF, KTM Municipality, Radhaswami Satsang, and many hospital partners. Supporting and running this center will be a major undertaking and responsibility of ANMF.

I just wanted to share with this group so that you can share it with others. Thanks to all you guys at ANMF USA for your hard work in fundraising and providing support!

Janak

A couple of corrections in my email above-

I forgot to mention MoHP on the list of partners/ stakeholders.

I also wanted to clarify the word "guys" includes both "guys & gals"! I hope everyone got that.

Janak
