MEMO

Date: 7/20/2021

Background

America Nepal Medical Foundation (ANMF) and National Innovation Center (NIC) have collaborated to transport 50 ventilators from the US that Gradian health systems donated and to help train healthcare workers to use these ventilators in Nepal. As a part of the plans for training healthcare workers, Gradian healthcare has also made available simulation kits as referenced on the invoice from 6/15/21 which is addressed to ANMF and NIC. NIC already paid over 40K USD in the US for the initial cost of ventilators and sim kit transportation.

Based on the above premise, ANMF US at its Executive committee meeting on 6/29/21 and after subsequent meeting with ANMF Nepal, agreed to pay NIC a total of 10000 USD. Also a proposal by ANMF Nepal was submitted for sim lab, ventilator training and field visit of the training places for an amount of 14450 USD. The proposal since then has been approved by ANMF US.

Out of the 10000 USD to be paid to NIC, 7239 USD will come from the remaining funds from the project 21ANMF003 Oxygen Concentrator & High Flow Nasal Cannula while 2761 USD will come from 21ANMF003- Ventilator Training Lab.

These payments will be made to NIC in two installments.

Respectfully,

.....
Prof. Dr. Bhupendra Kumar Basnet
President
ANMF-Nepal
