Dear Ganesh sir,

This is really exciting and encouraging!! Thank you very much to the ANMF leadership for supporting HFN on this important initiative.

HFN has already mobilized public health graduate to Gulmi to start planning with Dr. Uttam Pachya and municipality. Our Indian vendor is ready to send us kits by early next week. The protocols and trainings will happen over the weekend. We are hoping to start the project by next week. We will share further updates.

We hope ANMF continues to support other testing efforts in the future. We would be more than happy to provide technical support for other testing initiatives that ANMF may support. Also, it would be great if HFN and ANMF can strongly advocate to push mass testing in rural villages of Nepal with government.

Thank you very much once again.

Best,

Binita Adhikari
